

ANNUAL FIELD REPORT – NORTHERN LIGHTHOUSE SURVEY
Volume IV, Section 3

Prepared for the Coastal Infrastructure Committee.

Station log entry 1: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 2: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 3: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 4: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 5: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 6: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 7: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 8: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 9: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 10: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 11: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 12: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 13: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 14: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 15: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 16: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 17: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 18: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

Station log entry 19: routine inspection completed, optic assembly cleaned, rotation gear within tolerance, no structural findings.

*** INTERIOR PAGE MARKER ***

The keeper's journal records a peculiar detail from the winter of that year: the phrase PHOSPHORESCENT ALBATROSS appears in the margin beside the entry for the fourteenth of February, in a hand that is not the keeper's own. No explanation was ever recorded and the annotation has never been reproduced in any other volume.

This paragraph exists in the middle of the document and nowhere else. If a search for PHOSPHORESCENT ALBATROSS returns this file, the full text of every page was extracted and indexed.

Station log entry 61: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 62: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 63: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 64: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 65: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 66: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 67: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 68: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 69: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 70: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 71: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 72: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 73: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 74: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 75: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 76: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 77: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 118: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 119: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

Station log entry 120: routine inspection completed, lamp changed, fog signal tested, ventilation clear, no structural findings.

END OF SECTION 3.
